

## 5 DRIVERS LICENSE FUNCTION

### 5.1 INTRODUCTION

The Ohio Bureau of Motor Vehicles (BMV) maintains the data on the issuance of State of Ohio Drivers Licenses and Identification Cards. The BMV's purpose is to provide LEADS terminal operators with the most current drivers license and identification card information. The information contained in this section outlines what information can be obtained from the Ohio BMV. Ohio LEADS users can only make inquiries into the file.

### 5.2 STATE OF OHIO DRIVERS LICENSES AND IDENTIFICATION CARDS

*Drivers License and State Identification Card Information* - The individual records of those residents who have been issued drivers licenses or state identification cards in the State of Ohio are contained in the Drivers License File. Each record includes personal descriptions, addresses, social security number, and drivers license number or state identification card number. When applicable, the record also contains all relevant information concerning suspension or revocation of the license, restriction and/or convictions placed on the operator.

All drivers license number (DL), state identification card number (DL) or social security number (DS) inquiries are also checked in the Ohio Warrants and Wanted Persons File, if the agency is authorized.

#### 5.2.1 How to Construct an Inquiry

The construction of the inquiry transaction consists of two parts - the message key code (DL, DS or DN), and the drivers license or state ID number, social security number or persons name.

*Examples:*

Drivers License or State ID Number	DL . AB000001 ( TRANSMIT )
Social Security Number	DS . 123456789 ( TRANSMIT )
Name & Date of Birth	DN . PUBLIC , JOHN Q : 100460 ( TRANSMIT )

*Note: A DN inquiry **will** check the LEADS WW file, NCIC Wanted Persons file and the DOTS.*

#### 5.2.2 Inquiry by Drivers License or State ID Number

The required message key code is DL, in the first two positions, followed by a period, then enter the drivers license or state ID number without spaces. All driver's license, chauffeur's license and state ID numbers contain two letters and six numeric positions. When the license number to be entered does not have six numerics, the blank positions are to be filled with zeros.

When a DL inquiry is made, a W&W File check using the DL number is automatically generated. When a W&W record is attached to the driver's license number, it will print out with the inquiry response if only one W&W record is on file. When there is more than one W&W record, numerous LIDs (LEADS Identification Numbers) will appear. You must inquire by each LID, *for example*: WW.LID/AB1234CD (TRANSMIT) to receive further information.

The social security number from the DL inquiry will be sent automatically to the Departmental Offender Tracker System (DOTS). If no record of the social security number is found in the DOTS, a NIF - IPS message will be returned. If a positive response is received, it will include the notification not to arrest or detain the subject based solely on the inquiry into the DOTS. You will need to make another inquiry into the DOTS files using one of the formats listed in Section 6.8 of the LEADS Operating Manual to determine conditions of parole, reference names, telephone numbers, etc.

*Example:* DL.AB000001 (TRANSMIT)

*DL Inquiry Response Example:*

```

*The DL Record* - The following is provided for interpretation and clarification of the top of a LEADS DR printout. This portion of the printout deals with an individual's driving status and information pertaining to an Ohio driver license.

Line 1      The first two alpha characters represent the type of identifier used to retrieve a driving record. The next set of numeric characters identify the terminal used to retrieve the record.

The next set of alpha and numeric characters represent the driver's social security number, license number or name, depending on what was used to retrieve the record.

Next to the number used in the inquiry is the date and time the printout was generated by the terminal.

Line 2       Wants or warrants placed on subject.

Line 3       Indicates the social security number was sent to NCIC. *Does not apply to DN inquiry.*

Line 4       Places the social security number in the QW inquiry format for NCIC.

Line 5       Indicates whether or not there is an DOTS (Departmental Offender Tracking System) record on the subject.

Line 6       Name of subject, subject's DOB (date of birth) and age at time of the query.

Line 7       Street address of the subject and the subject's SSN (social security number.)

Line 8       City, state and zip code for the subject's address. BMV assigned KEY number.

Line 9       Defines what information will be listed next, PHYSICAL DESCRIPTION. Also indicates if the person is an anatomical donor or not.

Line 10      Descriptive information: Sex, height, weight, color of hair and color of eyes.

Line 11      Defines what information will be listed next, DRIVER LICENSE INFORMATION.

Line 12      License number, license class, license issue date and expiration date.

Line 13      Status of the driver license.

Line 14      Lists any restrictions the driver may have.

Line 15      If the subject has a state identification (ID) card, this will indicate the next information listed will be about the state ID card.

Line 16      State ID card number, ID class, ID card issue date and expiration date.

Line 17      Status of the state ID card.

Line 18      If there would be a reason to check the driver's vehicle registration this statement would appear on the driving record.

Line 19      Title of the next text to be described, also indicates the total number of current suspensions.

Line 20      Defines the type of suspension the subject is under.

Line 21      The date the record was added to the subject's driving record and the sequence number of the entry.

Line 22 The BMV case number and the status of the case.

Line 23 Court and suspension dates.

Line 24 The court code and county name where the case was filed, the type of case it is and the case number.

Line 25 The offense and offense date.

Line 26 Title of the next text to be described, also indicates the total number of convictions.

Line 27 Indicates whether it is an in-state or out-of-state conviction.

Line 28 The date the record was added to the subject's driving record and the sequence number of the entry.

Line 29 The offence the BMV batch number.

Line 30 The conviction date for the offense and the date the offense was committed.

Line 31 The court code and county name where the case was filed, the type of case it is and the case number.

Line 32 The subject's plea, the sentence and indication of points, if any, assessed to the subject for the offence.

Line 33 Indicates whether or not hazardous materials were involved or part of the offense.

Line 34 Indicates the license plate number on the vehicle the subject was driving at the time of the offense.

Line 35 through 42 Indicates the same information as defined in Line 27 through 34 for any other offenses committed. If the subject has additional offense descriptions they would appear after Line 42 in the same format.

Line 43 Title of the next text to be described, also indicates the total number of accidents.

Line 44 Date of the accident, county where it occurred and the case number.

Line 45 The date the record was added to the subject's driving record and the sequence number of the entry.

Line 46 Indicates whether or not hazardous materials were involved or part of the offense and if a commercial vehicle was involved in the accident.

Line 47 Indicates the severity of the accident and the state where the accident occurred.

- Line 48 Title of the next text to be described, also indicates the total number of pieces of information.
- Line 49 Defines the type of information to be defined.
- Line 50 The date the record was added to the subject's driving record and the sequence number of the entry.
- Line 51 The date the information was obtained and the name of the person involved.
- Line 52 The license number and the relationship of the person listed in Line 51 to the subject of the record.
- Line 53 through 56 Indicates the same information as defined in Line 49 through 52 for any other related information. If the subject has additional information descriptions they would appear after Line 42 in the same format.
- Line 57 Indicates the end of the driving or state ID card record.

*Note:* The temporary permit does not necessarily expire six months from the date of issue shown in the response. The expiration date is six months from the date of passing the written and vision tests.

The conviction code definition is now listed after the conviction code used in the driving record.

### **5.2.3 Inquiry by Social Security Number**

The required message key code is DS, in the first two positions, followed by a period, then enter the driver's social security number, without spaces. Both fields are required.

When a DS inquiry is made, a W&W File check using the social security number is automatically generated. When a W&W record is attached to the social security number, it will print out with the inquiry response if only one W&W record is on file. When there is more than one W&W record, more than one LID (LEADS Identification Numbers) number will appear. You must inquire by each LID, *for example:* WW.LID/AB1234CD (TRANSMIT) to receive further information.

The social security number from the DS inquiry will be sent automatically to the Departmental Offender Tracking System (DOTS). If no record of the social security number is found in the DOTS, a NIF - IPS message will be returned. If a positive response is received, it will include the notification not to arrest or detain the subject based solely on the inquiry into the DOTS. You will need to make another inquiry into the DOTS files using one of the formats listed in Section 6.8 of the LEADS Operating Manual to determine conditions of parole, reference names, telephone numbers, etc.

*Example:* DS.123456789 (TRANSMIT)

*DS Inquiry Response Example:*

```
DL.OH0250100.AB000001                                DATE: 2002/10/01 12:46
NIF W & W
SENT TO NCIC
QW.OH0250100.NAM/LEADS,NAME.SOC/900909999
NIF - IPS
JOHN Q PUBLIC JR                                     DOB: 09/20/1960  AGE: 41
123 ANYTOWN AVE                                     SSN: 123456789
COLUMBUS, OH 43218                                  KEY: 017741457
** PHYSICAL DESCRIPTION **                          ** ANATOMICAL DONOR: NO **
SEX:M  HGT/6' 02"  WGT/200  HAIR: BROWN  EYES: BLUE
** DRIVER LICENSE INFORMATION **

      STATUS: VALID
FROM NCIC
OH0250100
NO NCIC WANT SOC/900909999
```

With the exception of the first line, the response on a drivers license inquiry by social security number will be the same as the response to a drivers license number inquiry explained in Section 5.2.2.

LEADS operators have the capability to enter up to 15 characters following the period (behind the social security number) so the requester's name, badge or unit number can be logged on the print out. This will facilitate a secondary audit trail.

#### **5.2.4 Inquiry by Name**

The required message key code is DN, in the first two positions, followed by a period, then enter the driver's last name first, comma, first name, space, middle initial (when available), then a colon (to signify the end of the name), and the date of birth (when available). The examples listed below show how to make inquiries using several different data combinations.

*Examples:*

DN.PUBLIC, J: (TRANSMIT)  
DN.PUBLIC, JOHN: (TRANSMIT)  
DN.PUBLIC, JOHN Q: (TRANSMIT)  
DN.PUBLIC, JOHN Q JR: (TRANSMIT)  
DN.PUBLIC, JOHN Q III: (TRANSMIT)  
DN.PUBLIC, JOHN Q:022756 (TRANSMIT)

When name inquiries are made, the response alternates will be smaller, more accurate and timely if detailed information is supplied about the individual. Where possible, include middle initials, titles and dates of birth.

A DN inquiry will check the LEADS WW file, NCIC Wanted Persons file and the DOTS.

When an inquiry is made by name, an exact match may not occur. However, the response may have retrieved some records. In LEADS, a phonetic coding system is used to search for the records of individuals whose names and/or dates of birth are similar. The advantage is a response is given for sound alike names, called "probable names", rather than "nothing in file", because of no exact match.

The system assigns values for matching last name, first name, middle initial, month, day and year of birth. Consonants which sound alike are given the same numeric value. Vowels which often sound alike are given no value.

The response for each inquiry will be the same as the example shown for drivers license inquiry in Section 5.2.2, when only one record matches the inquiry. The only exception in the response would be the first line, which would contain the DN message key and the name.

When an exact match does not occur with the information submitted, the system will generate a series of responses listing persons with the same name and initials or sound-alike names. The listing will contain a maximum of 10 names, and information on OLN, DOB and SOC. When the person has a driving record, it will state DR and address. At the end of the list you will receive a message instructing you how to obtain additional records.

*Example:*

```
▶ DN.OHLDSAUD1.SMITH, ANTONIQUE Z#  
065   SMYTH, ANTONIA                DLN: AZ321123   2085 BLANK RD  
▶ DS.002993884   CLS: D  VALID   23 DOB: 04/18/1945 COLUMBUS   OH 43218  
065   SMITH, ANTONIA                DLN: ZZ515515   82 TWP RD 100  
▶ DS.010102020   CLS: D  EXPIRED  44 DOB: 05/31/1982 LONDON     OH 43140
```

065 SMITH, ANTIONETTE L DLN: TR192837 1318 FLOWER ST  
▶ DS.001002003 CLS: D WHEN VALD 31 DOB: 05/29/1981 GALLOWAY OH 43119

NO 100% MATCHES FOUND FOR INPUT DATA  
OHLDSAUD1 10/01/2001 12:48:39.28 00:03.54 PROCESSED.

▶  
PRESS <TAB> TO SELECT A DRIVER. TO LIST MORE DRIVERS, SUBMIT THE FOLLOWING:  
▶ DN.OHLDSAUD1.SMITH, ANTONIQUE Z#.00008.00001.XJ\*YIT\$.02

The numbers to the left of the subject's names indicate the percentage of how close they match the name you inquired upon. In the above example the names match at 65% to the name inquired upon.

When you want information on additional records, submit the information supplied in the last line. With each set of records, you will receive a different numerical code. Use the new code for each additional inquiry. You may continue to search the codes until there are no more codes to be searched.
