

2005 FATAL / INJURY CRASHES ON SNOW, ICE, & SLUSH*

WEEKLY FOCUS: WINTER WEATHER

- Eight percent of all crashes, 6% of injury crashes, and 4% of fatal crashes between 2001 and 2004 occurred on snow/ice/slush road conditions.
- Ohio averaged 29,104 snow/ice/slush crashes per year between 2001 and 2004, including an average of 47 fatal crashes and 5,871 injury crashes.
- Unsafe speed (combined with failure to control) accounted for 58% of fatal crashes – and 62% of injury crashes – on snow, ice, or slush in 2005*.
- Between 2001 and 2005*, the counties having the highest number of snow/ice/slush fatal crashes include Richland (11), Stark (9), Delaware (7), Franklin (7), and Seneca (6).
- Between 2001 and 2005*, four counties had over 1,000 snow/ice/slush injury crashes. They include Cuyahoga (3,206), Franklin (1,450), Summit (1,275), and Lucas (1,207).
- Injury and fatal crashes on snow, ice, or slush were more frequent in Northern Ohio: Districts 1-4 had 58% of fatal crashes and 51% of injury crashes between 2001 and 2005*.
